

PEATLANDS AND SOILS

Surface sphagnum vegetation transforms into peat moss after a lengthy decay process.

Tools Servicing the Industry and Researchers

VALORÈS is an applied science research institute, one of whose fields of expertise is devoted to the peat industry. Valorès provides essential analysis services for the assessment of soils and sustainable solutions to keep them healthy.

VALORÈS also offers expertise in “soils” in the agricultural and horticultural fields. Our goal is to help better understand and better manage soils and other growth substrates to avoid their degradation and retain their multiple functions.

Better knowledge of the composition (physical, water retention and chemical) of a soil allows to support a more sustainable use of agricultural soil and allows a constant improvement of horticultural substrates.

VALORÉS stands for
VALORisation of RESources

The Food and Agriculture Organization of the United Nations (FAO) says that global food production faces a problem of insufficient resources and sometimes inadequate management.

With research and awareness tools, VALORÉS improves the understanding of the issues allowing the development of sustainable solutions.

VALORÉS has been a leader in research and development in the peat sector for several decades. With a team of researchers and cutting-edge scientific tools, we offer you top-quality analysis, research and support capabilities.

Peat Industry

- Environmental impact studies
- Restoration plans
- Bogs Exploration services
- Employee training
- Horticultural substrates performance evaluation
- Hydric property analysis
- Support in innovation and sphagnum cultivation

Agricultural and horticultural sector

VALORÉS offers technical and scientific services to agricultural and horticultural sector companies in order to enhance sustainable use of soil resources.

- Soil health analysis services
- Hydric property analysis
- physical properties of the soil
- Substrate assessment growth
- Agricultural “organic” input evaluation
- Environmental impact studies

- Restoration plans, revegetation of bare areas
- Accompaniment for fruit conservation
- Micropropagation service for setting up seed banks

Services requests

To access our services :

- By phone (506) 336-6600.
- By email : info@valores.ca
- Online : on our website: www.valores.ca/Services
